

Spectral / Effective-Rank Analysis — CHECKERBOARD

Testing the low-rank discriminative alignment theory of CCKA

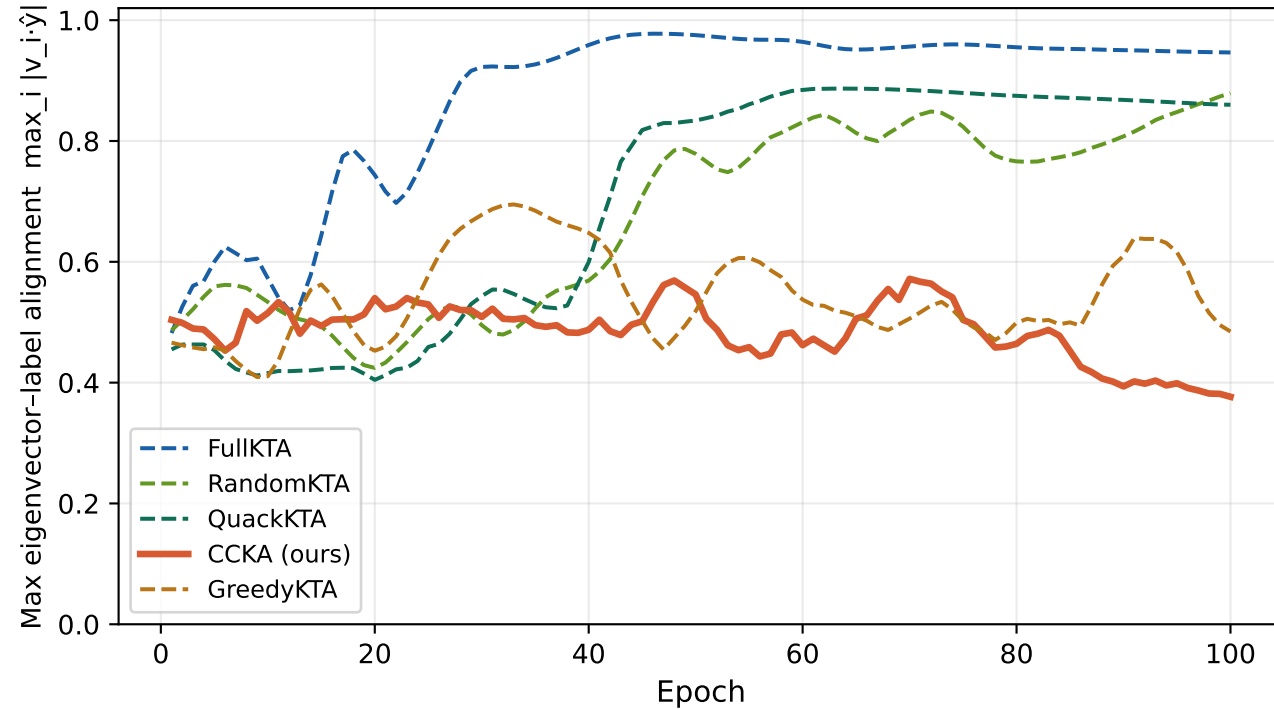

Effective rank over training — checkerboard
CCKA expected near 1 (rank-1); FullKTA much higher

Effective rank vs accuracy — checkerboard
CCKA (◆) achieving high accuracy at LOW eff-rank = rank-1 sufficiency

Best-aligned eigenvector over training — checkerboard
CCKA collapse (~ep64) should show a sharp drop here

KTA decomposition by rank — checkerboard
Near 1.0 = essentially all KTA in the top 1-2 directions (low-rank)
